Bench-Top Type Temperature (& Humidity) Chamber

SH-221 • 241 • 261 • 641 • 661
SU-221 • 241 • 261 • 641 • 661
Compact design for personal use
Ready to network with your computer.

Introducing a new lineup of our Bench-top Type Temperature (& Humidity) Chamber Series. Our latest models achieve superb performance in a compact size, and attains temperatures as low as \(-20^\circ C / -40^\circ C / -60^\circ C\), with capacity of 20L or 60L. They provide high performance and quality features with new capabilities for integration with our information network system E-PILOT 21. It is useful for centralized control and data processing, as well as operating chamber control and specimen measurement at the same time. All brought to you by ESPEC.
Small size & light weight
Chamber size is a compact 440W x 560H x 695Dmm (excluding protrusion), while its weight is only 66kg. Ensured the inside test area dimension at 300W x 300H x 250Dmm. (SU-221-241 100VAC model).

Compact design with high performance - - - SH-661
The new model SH-661 achieves -60 to +150°C / 30 to 95%rh in a compact design, and shows outstanding performance than any other previous bench-top models.

Select your optimum chamber from a full variation
The series provide six variations in temperature (& humidity) range of -20°C / -40°C / -60°C to +150°C (and 30 to 95%rh), and two capacities of 20L or 60L, with a total of 10 models altogether. A wide temperature (& humidity) range is offered in a bench-top model, enabling you to choose the right chamber.
Newly developed refrigeration system that saves energy consumption up to 55%

Our exclusive refrigerator capacity variable control system saves up to 55% energy consumption compared to our previous model.

Optional stand for space-saving layout

For use in limited space, we provide an exclusive stand with casters for stacking up to three chambers.

*Be sure to secure the stand onto the floor with earthquake resistant fittings for your safety when using stand.

Recycling

Molded resin and metal parts which can be recycled are clearly marked to make recyclable materials easier to identify during disassembly.

Ozone layer protection

The HFC refrigerant used is completely safe for the ozone layer.

Paperless Recording (optional)

The paperless recorder makes it easy record the temperatures of different components, such as the chamber temperature, on a memory card (Compact Flash).
**User-friendly**

- **Cable ports for running in wires**
  Each one 25mm diameter cable port is standard equipped on both sides of the chamber for wiring to the specimen. We also provide 50mm, 100mm diameter port and flat type cable port.

- **Cartridge tank for easy water supply**
  Once water is supplied into the tank, continuous operation is maintained for three days. Maintenance can be done easily from the front side. Additional water tank connection is available for further extended operation. (SH model)

- **Right-opening door (optional)**
  You may want to change the direction of opening the door to fit the installation space.

- **Viewing window for observation (optional)**
  A large window provides a clear view of your specimen during testing. (215W x 215Hmm for 20L model, 215W x 315Hmm for 60L model)

*The basic specification of the chamber will be modified.*

- **Flexible Computer Interface**
  Communication port RS-485 is equipped as standard. You can select RS-232C, GP-IB, and E-BUS communication port as option.
**Easy operation with 9 keys**

Temperature & humidity setting, timer setting, and upper/lower temperature & humidity limit alarm setting can be done with simple key operation.

**Programming operation of up to 9 steps**

In addition to constant setting, programming instrumentation is equipped to allow programmable operation to a maximum of 9 steps per pattern and the rise and fall gradient of temperature (& humidity) to be set to meet the application requirements for temperature characteristic testing and temperature (& humidity) cycle testing. Maximum 99-time repeat function and operational setting function after program execution are just two of the various functions offered.

---

### Description of program function

<table>
<thead>
<tr>
<th>Program function</th>
<th>Pattern</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Step program</strong></td>
<td><img src="#" alt="Step program diagram" /></td>
</tr>
<tr>
<td><strong>Temperature gradient program</strong></td>
<td><img src="#" alt="Temperature gradient program diagram" /></td>
</tr>
<tr>
<td><strong>Termination program</strong></td>
<td><img src="#" alt="Termination program diagram" /></td>
</tr>
</tbody>
</table>

*1 Sets a program repetition frequency between a range of 1 and 99.

*2 Selects HOLD, CONST or OFF when a program is over.
**Communication Network of Environmental Test Chambers**

Bench-top type temperature & humidity chamber incorporates the communication port RS-485 as standard to cope with the [E-PILOT 21](#), which is a newly developed centralized control system. E-PILOT 21 not only serves as a system for centralized control of environmental chambers, but also establishes an open network including specimen measurement function and remote chamber main-tenance function.

---

**ERC-200M**

- **Control, monitoring, programming, and datalogging for up to 16 ESPEC chambers can be performed through a single PC. RS-485 from ESPEC chambers connect via a serial bus converter to RS-232C on the PC.**
- **Remote operation**
  - Have full control of test chambers while sitting in your office.
- **Potential savings**
  - Because the ERC-200M allows program operations to be run directly from the PC, test chambers with less-expensive single-setting controllers can be used.
- **E-BUS version available**
  - For existing units with E-BUS system, ERC-100M is available.

---

**E-PILOT (ERC-100S)**

- The high-level of functions offered by ERC-200M is included in a non-networked package, meant for a single chamber to be interfaced with your personal computer. The RS-232C communications port option is required, but the software is free.
- **For one-to-one users**
  - If you are not ready to establish a network of test chambers, this software would be an ideal trial of the capabilities of our ERC-200M package.
- **Freeware**
  - ERC-100S can be downloaded from our website for free at [www.espec.co.jp/english](http://www.espec.co.jp/english).

---

**E-PILOT (ERC-300M)**

- Set up an Intranet Web-PILOT site to allow monitoring of up to 16 chambers through one PC (possible with E-BUS communications system). Monitor the settings and operation of your chambers from any PC on the Intranet. Web-based method allows display of chamber information across many computer platform types.

---

**E-PILOT (LabVIEW)**

- Provides an interlocking system of testing and measuring devices that allows customers currently using LabVIEW to link to ESPEC chambers, opening new horizons for environmental testing. Optional E-BUS or GP-IB (IEEE-488) communications interface is required.
- **Driver software to connect test chambers are provided for free**
  - Lab VIEW drivers are available to give the basic building blocks for addressing ESPEC equipment. Drivers required for connecting ESPEC products to a personal computer is provided for free. For further information, please contact your nearby ESPEC sales office.

---

**CMS-J30**

- This is a fully customizable system that provides centralized control, centralized monitoring, remote operation and specimen data management of ESPEC products (up to 32 units of which 16 are dedicated to centralized monitoring) by the use of a PC. (E-BUS compatible)
- **Freeware**
  - ERC-100S can be downloaded from our website for free at [www.espec.co.jp/english](http://www.espec.co.jp/english).

---

*The series of application softwares and network systems are provided on a separate basis from the chamber.*

**TEMPERATURE & HUMIDITY CONTROL RANGE (SH type only)**

- Model: ES-102
- Operation mode: Program operation, Constant operation
- Display: 7-segment LED display
- Setting: Mechanical key input
- Program capacity: 9 steps/1 pattern (1 to 99 repetitions)

**Setting and indication ranges**
- Temperature: 25 to +155°C (SH-221, SU-221)
- Humidity: 0 to 100%rh (SH only)
- Time: 0 to 99 hours 59 minutes, 100 to 999 hours

**Setting and indication resolution**
- Temp: 0.1°C
- Humid: 1%rh (SH only)
- Time: 1 minute

**Indication accuracy**
- Temp: 0.5°C (Typ.)
- Humid: ±2%rh (Typ.) (SH only)
- Time: within 30 sec, per month

**Input**
- Thermocouple type T (Copper/Copper-Nickel)

**Control**
- PID control

**Communication function**
- RS-485

**Auxiliary functions**
- Input burn-out detection function
- Upper and lower temperature & humidity limit alarm function
- Self-diagnostic function (watchdog timer)
- Alarm indication function
- Power failure protection function
- Timer function (automatic start/stop)
- Refrigerator capacity automatic control function

**Battery**
- Lithium battery, 1

*At +23°C, ±5°C ambient temperature.

⚠ Do not use specimens which are explosive or inflammable, or which contain such substances. To do so could be hazardous, as this may lead to fire or explosion.

⚠ Do not place corrosive materials in the chamber. If corrosive substances or humidifying water is used, the life of the unit may be significantly shortened.

⚠ Do not place life forms or substances that exceed allowable heat generation.

Be sure to read the instruction manual before operation.

**OPTIONS**

**Paperless recorder**

Records temperature inside the chamber. Additional inputs may also be recorded.

**[Temperature type]**

- Temperature range: -100 to +200°C
- Number of inputs:
  - Temperature 1 (5 more but turned OFF*)
- Data saving cycle: 5 sec
- External recording media: CF memory card (32MB)
- *Settings may be modified.

**[Temperature and humidity type]**

- Temperature range: -50 to +150°C
- Humidity range: 0~100%rh
- Number of inputs:
  - Temperature 1 / Humidity 1 (4 more but turned OFF*)
- Data saving cycle: 5 sec
- External recording media: CF memory card (32MB)
- *Settings may be modified.

**Temperature recorder Portable type**

**Temperature & humidity recorder**

- SRJ14: 100 to +150°C / 0 to 100%rh (for SH)
- SRJ12: 50 to +150°C / 0 to 100%rh (for SH)
  - 100mm
  - Portable type
  - 6 dots
- Temperature: 5 dots
- Thermocouple type T (Copper/Copper-Nickel)
- Humidity: 1 dot
- DC1 to 5V
- Digital
- Free power supply (100VAC to 240VAC)

**Viewing window**

A window is installed on chamber door.

- SH: 221 × 241 × 261 W 215 H 215mm
- SU: 221 × 241 × 261 W 215 H 215mm
- SH: 641 × 661 W 215 H 315mm
- SU: 641 × 661 W 215 H 315mm
- *The basic specification of the chamber will be modified.

**Inner door**

A glass door is provided inside the chamber door for observation.

* A wiper is equipped for the SH model.

**Wet-bulb temperature detecting terminal**

Detects wet-bulb temperature inside the chamber. Equal electromotive force as Thermocouple type T (Copper/Copper-Nickel).

- Equipped with connector.
- *Not available for SU

**Thermocouple**

Measures the temperature of specimens

- T (Copper/Copper-Nickel)
- 2, 4, 6m

**Right-opening door**

Door can be exchanged to a right hinged door.

*Not available with inner glass door option.
OPTIONS

**Cable port**

Additional cable ports are provided on the wall of the chamber.
- 25, 50, 100mm diameter
- Flat cable port

*One silicon sponge rubber port plug is equipped per one cable port.*

*Basic specification of the chamber may not be effective when equipped with a cable port.*

**Stand**

This stand enhances mobility of the chamber and ease the work to load/unload the specimen. Stand for stacking two or three chambers save installation space.

*Be sure to secure the stand onto the floor with earthquake resistant fittings for your safety especially when using stand for two/three chambers.*

![25mm diameter type](image1)

![50, 100mm diameter type](image2)

**Cable port rubber plug**

The additional silicon sponge rubber port plug.

**Shelf**

Auxiliary shelves on request.
- SH/ SU-221-241-261
- Effective size 200W x 150Dmm
- Load capacity (uniformly distributed load) 500g
- SH/ SU-641-661
- Effective size 300W x 300Dmm
- Load capacity (uniformly distributed load) 5kg

**Specimen basket**

- Size 206W x 40H x 156D mm
- Material 18-8 Cr-Ni stainless steel, 5 mesh metal basket

**Auxiliary water tank circuit (for SH)**

Automatic water supply circuit is equipped to replenish the standard tank from the auxiliary water tank.
- Supply water quality - pure water
  - (electrical conductivity 0.1~10 μS/cm)
- Water supply pressure 4.9~19.6KPa (Gauge)

**Auxiliary water tank (for SH)**

Auxiliary tanks are provided to replenish water to the standard tank.

**Tray for auxiliary water tank (for SH)**

Protects water from leaking while supplying water from the auxiliary water tank.

**Drain tank (for SH)**

Storage tank for drain water with a full indication buzzer.

**Communication functions**

Computer interface
- GPIB
- RS-232C
- E-BUS

*Select one other than standard RS-485.*

**Communication cable**

- RS-485 5, 10m
- GPIB 2, 4m
- RS-232C 1.5, 3, 5m
  - 1.5, 3, 5m for extension
- E-BUS 5, 10m
